

The School Board recognizes the need to provide and maintain the District's facilities in a manner that allows for the availability of quality educational opportunities to the students of the District.

This requirement includes providing quality facilities, modern and effective equipment, experienced staff, and up to date management procedures so that this need can be obtained and constantly maintained and to do so in an effective, economical basis. In this regard the School Board will establish more specific policies that will provide guidelines for the Administration in working to reach this level.
